

# ***Filtering the Web***

# ***My Thoughts***

- Parental Control Software is ***not*** the “Silver Bullet” to our problem of protecting and monitoring our children while they are online.
- Educating our children how to use the WWW in an appropriate manner, ***is the solution***.
  - *We believe that explicitly teaching students about safe and responsible online behaviours is essential and is best taught in partnership with parents/guardians.*  
(Cornish College ICT User Agreement)

# ***My Thoughts***

- Our children do ***not*** understand how iPads and computers work.
- Constantly monitoring your child while they are on iPads and computers is not practical.
- Computers can be “locked down” (and should be)
  - The default user settings for a new computer is for the user to have unrestricted access to everything on the computer.

# ***I Wish I Could ....***

- **Block access to inappropriate web sites**
  - adult / hate / gambling / drugs sites
- **Turn the internet off at defined times**
  - Off at 8:00 pm and on at 8:00 am
- **Block access to specific web sites whenever I want.**
  - YouTube / Facebook
- **Review what my children have been viewing on their computers.**
- **Stop my wife shopping on the internet.**
  - Possible, but not worth the hassles.

# ***Parental Control Software***

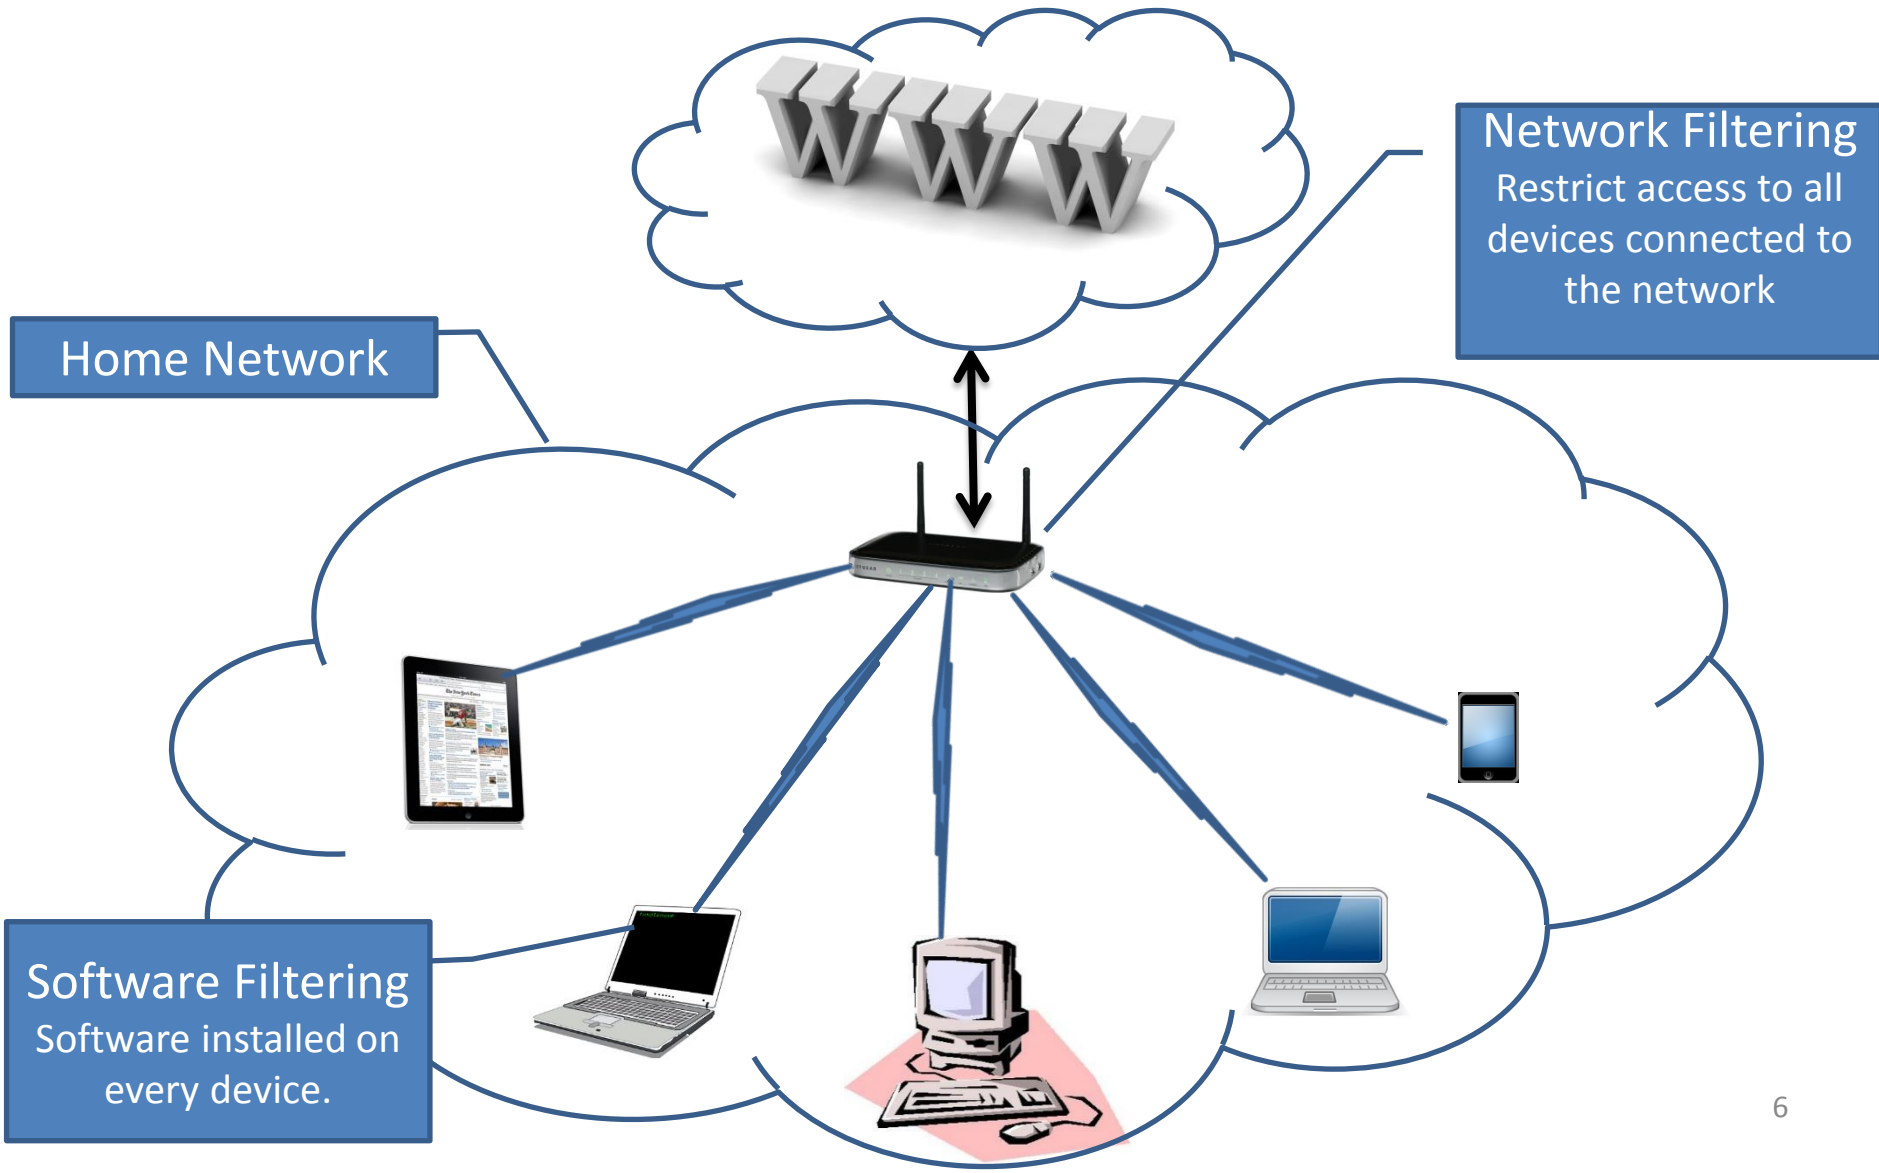

## ***What is it?***

### **Key Features Include ....**

- **Filters / Blocks unsafe Web content**
  - adult / hate / gambling / drugs sites
- **Set time limits for computer / internet access**
- **Monitor emails / instant messages (IM)**
- **Logs user activity**
  - Websites visited
  - Websites blocked
  - Time on computer

# ***Two ways to implement Parental Control Software***

# ***Parental Control Software***

## Two ways to implement Parental Control Software

### 1. Install software on individual computer

Software suppliers include ...

- McAfee Safe Eyes / McAfee Family Protection (new product)
- Mobicip
- Net Nanny
- K9 Web Protection
- WebWatcher

### 2. Install software on the network

Filters all computers attached to the network

- OpenDNS
- Norton ConnectSafe

# OpenDNS

**HOME NETWORK**  
Laptops, IPad, Mac Air,  
iPod Touch

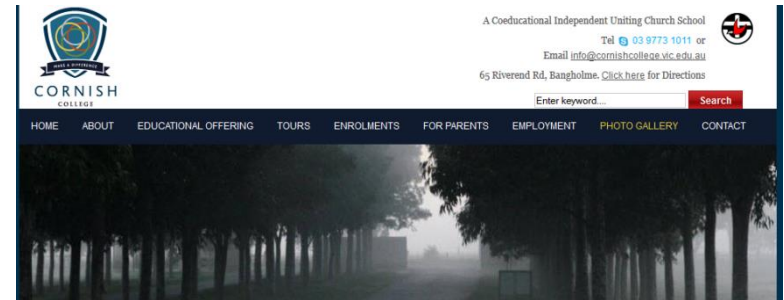

**ROUTER**  
Connects your home  
computers to the  
WWW

# OpenDNS

**How does your computer find  
the Cornish College web site?**  
[www.cornishcollege.vic.edu.au](http://www.cornishcollege.vic.edu.au)

[www.cornishcollege.vic.edu.au](http://www.cornishcollege.vic.edu.au)

Home Computer

Home Router

- **How does your computer find the Cornish College web site?**
  - People understand Web site address (URLs).
    - `www.cornishcollege.vic.edu.au`
  - Computers understand IP addresses.
    - `112.140.177.187`
  - DNS stands for “Domain Name System”
    - It’s “the phonebook for the Internet.”
  - DNS server translates Web site address into IP addresses
    - `www.cornishcollege.vic.edu.au = 112.140.177.187`

# How Does DNS Work?

1. User types URL ([www.cornishcollege.vic.edu.au](http://www.cornishcollege.vic.edu.au)) into browser
  - A URL means nothing to a computer it needs an IP address
2. Home computer asks the “router” if it knows the IP address of the URL
  - Router does not know, but it has the address of the DNS server which does know.
3. Home computer then asks DNS server if it knows the IP address of URL
  - DNS server has a list of all URLs and the corresponding IP addresses
4. DNS server converts the URL into an IP address
  - [www.cornishcollege.vic.edu.au](http://www.cornishcollege.vic.edu.au) = 112.140.177.187
5. DNS server sends the IP address back to the home computer
6. Home computer can now find [www.cornishcollege.vic.edu.au](http://www.cornishcollege.vic.edu.au) by using the IP address (112.140.177.187)

## Would You Be Interested In This ....

Every time you requested an IP address from a DNS server, it checked the content of the site before sending you the IP address.

- If the site content is appropriate, you are sent the IP address
- If the site content is inappropriate, you are not sent the IP address.

# OpenDNS

## Would You Be Interested In This ....

All that is required is to change your 'router' DNS address to ....

208.67.222.123

208.67.220.123

# OpenDNS

## How to configure a Netgear Router

routerlogin.com

Microsoft Edge

Microsoft Edge

The server www.routerlogin.com is asking for your user name and password. The server reports that it is from NETGEAR DGND3700v2.

Warning: Your user name and password will be sent using basic authentication on a connection that isn't secure.

admin

Remember my credentials

OK Cancel

Example :- Netgear router  
Open a browser (Safari, FireFox, IE)  
Type: [www.routerlogin.com](http://www.routerlogin.com) into browser  
Default username : admin  
Default password : password

# OpenDNS

The screenshot shows the NETGEAR router configuration interface for a DGND3700v2. The 'ADVANCED' tab is selected, and the 'Internet Port' section is highlighted with a red box. The 'Domain Name Server' field is set to 208.67.222.123 and 208.67.220.123. Other sections visible include Router Information, Wireless Settings (2.4GHz and 5.0GHz), and Guest Network settings.

## Web Filtering

The screenshot displays the safeeyes Family Internet Manager interface. The top orange banner features the safeeyes logo and the text 'Family Internet Manager' on the left, and a large yellow number '6' on the right. Below the banner, there are links for 'help', 'support', and 'logout'. A left sidebar contains a list of navigation items: 'Family Summary', 'Web Sites' (highlighted with a red circle), 'Videos', 'Music', 'Instant Messaging', 'Games', 'Social Networking', 'Email', 'Time Limits', 'Activity Reports', and 'Instant Alerts'. The main content area is titled 'Web Sites' and includes a 'Settings For:' dropdown menu with 'nickstew' selected (circled in red). Below this, the 'Limit Web Sites By Category' section is highlighted with a blue arrow pointing to it. Under this section, the 'Change Blocked Categories' link is circled in red. Other visible sections include 'Allow or Block Your Own List of Sites' with links for 'Change Blocked Sites' and 'Change Allowed Sites', and 'Enable Safe Search' with a checked checkbox for 'Enable Safe Search on popular search sites'. The bottom blue footer contains the InternetSafety.com logo, the text 'Advanced Settings' and 'You are protected until: 01-24-2016', and the page number '26'.

# TELSTRA MOBILE PROTECT

## Internet content control

Select a filter suitable to your children's age. These filter levels are suggestions only. Custom settings are also available and you can access more information about what's restricted so you can select the appropriate filter for your phone.

Some apps associated with websites in these filters will be allowed or blocked accordingly.

☐ OFF

All internet content will always be accessible for browsing outside of time and specific site restrictions

☐ LOW

Sites you can trust your older children to enjoy on their own

### Allowed content

- ✓ E-mail
- ✓ Adult content
- ✓ Advanced search and page redirection
- ✓ All entertainment sites
- ✓ General information and news

### Blocked content

- ✗ Some security protocols and softwares

☒ MEDIUM

Sites known to be safe for younger children

### Allowed content

- ✓ E-mail
- ✓ All entertainment sites
- ✓ General information and news

### Blocked content

- ✗ Some adult content
- ✗ Most security protocols, softwares, and safe search

☐ HIGH

Blocks inappropriate content for young children

### Allowed content

- ✓ E-mail
- ✓ General information and news

### Blocked content

- ✗ Most adult content
- ✗ Most security protocols, softwares, and safe search
- ✗ Games
- ✗ Investing, job search, sales, and webchat

☒ CUSTOM

Customise categories you want to block specifically for your children

# TELSTRA MOBILE PROTECT

Telstra Mobile Protect > Internet time restrictions

Mobile [redacted]

## Block internet access

Set times you want to block all access to the internet from your phone.

For example, you can block internet access for your child during homework time.

You have previously set up time restrictions. Selecting a different time zone will override your previous selection. This means that the time zone you include here will also apply to calls and messages.

Timezone [Change timezone](#)

From  to  between  and

# Administration Rights on the Computer

# Administration Rights on the Computer

- **Administration Rights on the Computer-** If parents allow kids to access computers with administration ("admin") rights, they can get around or uninstall any security software, including web filters.  
([http://www.contentwatch.com/company/press/internet\\_safety\\_month\\_2011](http://www.contentwatch.com/company/press/internet_safety_month_2011))
- Each User must have their own “User Account” to log on to the computer.
- Each computer must have one Administration account.

# Administration Rights on the Computer

- Two types of “User Accounts” on computers
  - Administrator Account (God account)
    - Have full access to the computer
    - Can install and uninstall programs
    - Can access other User directories.
    - Can modify and delete computer files that will make the computer unusable.
  - User Account
    - Has restricted access to the computer
      - Can not install or uninstall software
      - Can not change system settings
      - Can not access other users directories.
    - Level of access is determined by the “Administrator” account.

# Administration Rights on the Computer

- Only one Admin account per computer
- Each “User” must have their own “User Account”

Mac Air Computer

# Administration Rights on the Computer

- Three different “User” accounts on Mac

- Administrator

- Standard

- Managed

- Guest

	Administrator	Standard	Managed	Guest
Can change all system preferences	yes	no	no	no
Can change system preferences that affect his or her account	yes	yes	no	yes
Can manage user accounts	yes	no	no	no
Can install software for all users	yes	no	no	no
Can install software for personal use	yes	yes	no	no
Can run all applications installed on the Mac	yes	yes	only those selected by the administrator	yes

# Task Check List

- Create separate user accounts for each child / parent on the home computer.
  - Only have one administrator account on the computer
    - Name it “Admin” or “HomeAdmin” (name does not matter)
    - Make sure it has a password
  - Family members (Mum, Dad, Jack, Jill) should only have
    - “Managed Account” for Mac.
  - Do not give the children the administrator password

# Apple Support Setting Restrictions

Instructions on how to set restrictions on the device can be found here.....

- Macs
  - <https://support.apple.com/kb/PH21683>
- iPads
  - <https://support.apple.com/en-au/HT201304>

# Apple Support

## Set up Family Sharing

[Family Sharing](#) makes it easy for up to six people in your family to share each other's iTunes, iBooks, and App Store purchases without sharing accounts. Pay for family purchases with the same credit card and approve kids' spending right from a parent's device. And share photos, a family calendar, and more to help keep everyone connected.

- <https://support.apple.com/en-au/HT201088>

***Office of the Children's eSafety Commissioner*** - <https://esafety.gov.au>

The Office of the Children's eSafety Commissioner is a one-stop-shop for online safety. The Office provides Australians a range of up-to-date information and resources, coupled with a comprehensive complaints system to assist children who experience serious cyberbullying.

***Common Sense Media*** - <http://www.commonsensemedia.org>

Sign up for Common Sense Media to become acquainted with some of the resources that they have for children, parents and teachers. This site is well worth subscribing to be kept up to date on cyber safety, appraisals of apps, movies and books and relevant issues that may affect your child.
